an air pump for inflating the chamber, the air pump having an air intake and an air outlet, wherein:

the air intake is connected to the outside of the chamber and the air outlet is connected to the inside of the chamber when the air pump is moved to first position; and

the air intake is connected to the inside of the chamber and the air outlet is connected to the outside of the chamber when the air pump is moved to second position.

- 2. An inflatable product as claimed in claim 1, wherein the air pump further has a substantially rolling-pin-shaped housing, a fan and motor provided in the housing.
- 3. An inflatable product as claimed in claim 2, wherein the substantially rolling-pin-shaped housing has two ends, and the air intake and the air outlet are respectively provided on the ends of the housing.
- 4. An inflatable product as claimed in claim 1, further including a piping system connected between the air intake of the air pump and the outside of the chamber when the air pump is moved to the first position, and connected between the air outlet of the air pump and the outside of the chamber when the air pump is moved to the second position.
